## Balance-chain gaps (disclosed, not booked)

Evidenced Bank Shahr balance snapshots vs recorded ledger flows; figures approximate, in toman.

Decision S-01: bank balances implied by the evidenced snapshots do not reconcile with recorded flows. These movements are disclosed, not booked; open item OI-07 asks for the Bank Shahr statement.

- **M-003** — TX0002 notes: Dossier A discrepancy: old note implied an anomaly (rounding gives 2,900 but 3,000 paid); all three instructor fees were rounded up, so 3,000 is consistent.

- **M-012** — TX0033 notes: Dossier A discrepancy: old note linked photo_34 to TX0033 'uncertainly'; the dossier assigns photo_34 to TX0035 (message107 line 3). TX0033's message_ids carries no photo token, so nothing is removed there.
- **M-013** — TX0034 description_en: Decision P-03 (Dossier A): TX0034 (1,500,000) split into 1,000,000 prizes (this row) + 500,000 association flash drive (TX0034-B); replaces the old combined description.

- **M-015** — TX0034-B description_en: Decision P-03 (Dossier A): new row TX0034-B (500,000, Association operations / Equipment) carries the flash-drive half of the old combined TX0034.

- **M-017** — TX0035 message_ids: Dossier A: photo_34 (photos/photo_34@27-06-2026_18-26-03.jpg, caption message147) is TX0035's probable invoice (message107 line 3, 'هرفرف…'); its caption message is added here. TX0033's message_ids never carried a photo token, so there is nothing to remove on that side (its stale note is corrected separately).

## Method

Source: reports/2026-10-10/Transactions.csv (96 rows, read-only). Evidence: the accounting Telegram group export (message ids), the receipts folder, invoices and workbooks. Date bases: printed = the date on the document; event-day proxy = the event day; on or before = an upper bound; month only = month precision, flagged; Telegram post time = the post's server timestamp; reports posted = the day the financial report was posted; by event association = period inferred from the event. Amounts are toman (1 toman = 10 rial); totals compare within 0.5 toman. Nothing under reports/2026-10-10 or reports/2026-10-14 was modified.
