Balance-chain reconciliation & bank statements

In earlier audits (2026-10-18), significant unexplained balance movements were noted on Bank Shahr deposit 400816808774. With the submission of bank statement 80.pdf (covering mid-1404 through Mordad 1405) and Blu statement 14050812012318.xlsx, the custodian clarified that no separate association bank account was opened; association and personal funds were actively commingled across his cards. Consequently, balance jumps reflect personal transactions and transfers between personal accounts. The ledger reconstruction establishes that the association has net cumulative surplus funds of 14,880,382 toman held by the custodian.

Open items settlement

All 18 previously open items have been settled through the owner clarifications pack and corroborating bank statements.
