# 1st Condensed Matter Confrence (13-15 Aguest 2020)

| | Thursday, 13th Aguest | |
|---|---|---|
| **TIME** | **Speaker** | **Title of Talk** |
| 10:00-10:20 | R. Nazifi | Effect of substrate roughness on the response of YBCO transition-edge bolometer |
| 10:25-10:45 | Z. Khatibi | Excitonic insulator phase and dynamics of condensate in a topological one-dimensional model |
| 10:50-11:10 | R. Radgohar | Robustness of Majorana edge modes against noise: The role of long-range interactions in Kitaev chain |
| 11:10-11:25 | *Break* | *Break* |
| 11:25-12:10 | Dr. Kameli | Next generation of cooling technology: Magnetic cooling |
| 12:15-12:35 | Dr. Razbin | Statistical physics of semiflexible polymers with intrinsic curvature |
| 12:40-13:25 | Dr. Mashkoori | Identification of topological superconductivity in magnetic impurity systems using bulk spin-polarization |
| 13:30-13:50 | M. Shabanniya | Magnetic separation of dipolar spheroids in channel flow |

| | Friday, 14th Aguest | |
|---|---|---|
| **TIME** | **Speaker** | **Title of Talk** |
| 10:00-10:20 | Dr. Salehi | Chiral transfer torque and chirality polarization in the Dirac/magnetic Weyl semimetal junction |
| 10:25-10:45 | Dr. Shakeripour | Superconductivity: How to measure the superconducting gap symmetry |
| 10:50-11:10 | M. Amirimoghaddam | Investigation of properties of $Y_{1-x}Li_xBa_2Cu_3O_{7-d}$ superconductor |

| TIME | Speaker | Title of Talk |
|---|---|---|
| *11:10-11:25* | *Break* | *Break* |
| 11:25-12:10 | Dr. Esfandiar | Applications of 2D Materials in ionic transport |
| 12:15-12:35 | Z. Ghazinezhad | Investigation of structural and magnetic properties of $Ni_{47}Mn_{40}Sn_{13-x}Cd_x$ (x = 0, 0.75, 1, 1.25) ferromagnetic shape memory alloys |
| 12:40-13:25 | Dr. Abedinpour | Electronic properties of topological semi-metals |
| 13:30-13-50 | M. Sebtosheykh | Non-central induced force by self-tapping rods between two colloidal discs |

**Saturday, 15th Aguest**

| TIME | Speaker | Title of Talk |
|---|---|---|
| 8:15-9:00 | Dr. Dehghani | Extraction of the many-body Chern number from a single wave function: Theory and Proposed Experiment |
| 9:05-9:25 | O. Tavakol | Artificial electric field and electron hydrodynamics |
| 9:30-10:15 | I. Ahmad Abadi | Ruddlesden–Popper Phases of Methylammonium-Based Two-Dimensional Perovskites with 5-Ammonium Valeric Acid $AVA_2MA_{n-1}Pb_nI_{3n+1}$ with n = 1, 2, and 3 |
| *10:15-10:30* | *Break* | *Break* |
| 10:30-11:15 | K. Hejazi | Moire magnets |
| *11:15-12:00* | Dr. Ghanbarnejad | TBA |
| 12:00-12:45 | Dr. Seyedreihani | Optical micromanipulation of biological components |
| 12:50-13:10 | Z. Jafari | Dynamics of entanglement in two qubits systems |
